» **How to Disable "Save Passwords" Option in Browser:**

- **Chrome:**

1. Open Google Chrome.	2. Click on the main menu at the top-right corner and select **Settings** from it.	3. Click on **Show advanced settings** at the bottom and then uncheck the option **"Offer" to save passwords with Google Smart Lock for Passwords"** under the **Passwords and forms** section.	4. This will stop chrome from prompting you to save passwords every time you log in to a website. If you want to delete previously saved passwords, then click on the **Manage passwords** link next to it.	
5. A window will open where you can see all your saved passwords. Simply click the **cross** (X) button next to each entry to remove it.
